NORTON SPOT REPAIR SYSTEM

Step 1 – Defect Removal

To remove surface defects from clear coat

- Apply a 1-3/8" or 3" Speed-Grip disc (P400 to 2500 grit size based on severity of defect) onto a Speed-Grip back-up pad. (For 3" use the interface pad.)
- Use a mini D/A (or use a hand sand pad available in 1-3/8" only).
- Use water as a lubricant on clear coat surface and sand out defect.
- It is imperative that the sander remains flat on the surface and the area is not over sanded.
- Finish by wiping sanding residue off with a Blue Magnet cloth.

Step 2 – Buffing/Polishing

Restore luster to original clear coat surface using 3" right angle polisher

- Apply blue foam or black wool/interface pad onto a backup pad.
- Apply a dime-size amount of 03B or 04B to the sanded area.
- With the tool turned off, use the polishing pad to spread the compound evenly over the sanded area, then start the tool.
- Polish to achieve the desired result.
- If required, use previous steps with 02B and a Soft White Foam pad to remove swirl marks or haze on dark colors.
- Apply 01B Finishing Polish by hand as a protective coating and to enhance luster with a Quick Wipe cloth. Wipe the area clean with a Blue Magnet cloth.

NORTON

Norton Spot Repair System

Spot Repair Kit

DESCRIPTION	UPC NUMBER	PKG	PKG/CASE
Spot Repair Kit	636425-36216	1	1

Contents:

Clear Choice Liquid Abrasives

Norton Clear Choice silicone-free Liquid Abrasives lead the way in performance. This easy to use line of products produces outstanding results without the contamination risks often associated with silicone-containing products.

Finishing Polish for final polishing step and weather protection. Ultrafine Renovator for refinement of minor paint work defects, Fine Abrasive for elimination of sanding marks and Extra Abrasive for faster removal of heavier defects.

FEATURES	BENEFITS OF CLEAR CHOICE
■ Two step compound system	■ Faster than competitive systems
■ Silicone free	■ Saves time and money
■ Silica free	■ No risk of contamination
■ Ammonia free	■ No health and safety risks for the operator
■ Globally successful formula	■ No paint contamination risk
	■ Tested and used by OEM's and bodyshops throughout the world
	■ Used and recommended by major automotive paint manufacturers
