

2K Aftermarket Chip Resistant Clearcoat

**AMAZING
NEW
PRODUCT**

2K Aftermarket Chip Resistant Clearcoat (BCG4) is the latest in the line of quality clearcoats offered by the Dominion Sure Seal Group. **BCG4** is a high solids quality clearcoat that protects O.E.M. and aftermarket finishes from rocks, gravel and other road debris. It is especially suited for front bumpers and leading edges that are subjected to flying rocks and other road debris but works well wherever any clearcoat finish is used.

Like all of our quality clearcoats **BCG4** offers excellent UV protection and will not yellow, discolor or become dull after being exposed to normal weather and sunlight conditions.

Application and cleanup is the same as our other clearcoats. If the application calls for tough, resilient, chip and scratch resistant protection, then **2K Aftermarket Chip Resistant Clearcoat** is the product for you.

**CODE 101004
STOCK BCG4**

We Passed All Rigorous Testing . . .

- Our Space Age Formula passed rigorous UV testing by the Xenon Weatherometer. Testing showed no evidence of chalking, cracking, swelling, blisters, adhesion, yellowing or discoloration.
- Gravelometer testing as specified by SAE J 400 revealed no chipping, pocking or cracking after being subjected to stones and nuts for 3 hours in the gravelometer chamber. **We even fired "BB" gun pellets at the surface with no evidence of damage!**

Space-Age 2K Aftermarket Chip Resistant Clearcoat protects your vehicle's most vulnerable areas against chipping, cracking and scratches!

- When applied to your vehicle's most vulnerable areas **BCG4** is a resilient and durable 2 part coating designed to repel stones and road debris.
- Money back guarantee!

- When applied this 2 part clearcoat **leaves no film lines** as happens with protective adhesive film applications.
- When applied at 25°C (77°F) Aftermarket Chip Resistant Clearcoat will be dry overnight, or may be force dried.
