

## Bulldog Sealer & Adhesion Promoter System

**PABC 124**

**Abrasive Cleaner**

**GBDS 12326, QBDS 12327 \***

**Sealer & Adhesion Promoter (liquid)**

**EBDS 12328 \***

**Sealer & Adhesion Promoter (aerosol)**

Bulldog® Sealer & Adhesion Promoter is the only one-component sealer and adhesion promoter for the auto body collision repair market that can be used on both primed and painted metal and plastic. Bulldog® seals these surfaces, offering fast dry times and excellent holdout, while filling scratches. It can also be tinted with basecoat for better hide. Patent Pending.

### Features:

One Component:

Makes Paint Stick:

Reduces Material Cost:

Reduces Sanding:

Reduces Painting Time:

VOC Compliant:

No Waste:

Tintable:

### Benefits:

No mixing required

Seals primed and painted metal and promotes adhesion on all types of automotive plastic

Reduces 3 components to 1

Fills 320 grit scratches

Dries clear in 5 minutes

Meets 2010 National VOC Regulations for Adhesion promoters

Unused product can be poured back into can

Tint with basecoat for visible coverage

### Compatible Coatings:

Sealer - All solvent-based urethane and acrylic lacquers. Acrylic enamels can be applied after at least a 1 hour dry time.

Adhesion Promoter – All solvent-based urethane, epoxy, or acrylic lacquer, primer, sealers and basecoats.

### Compatible Surfaces:

Sealer - All primed or painted metal surfaces

Adhesion Promoter – All types of automotive plastic

### Related Products:

GSW362 Prep-All Wax & Grease Remover

ESW362 Prep-All Wax & Grease Remover

**NOTE:** Always apply basecoats and clearcoats according to manufacturer's instructions.

\*This product cannot be used as a sealer in California.

# Bulldog Sealer & Adhesion Promoter System

**GBDS 12326 / QBDS 12327**

## DIRECTIONS FOR USE:

**Shake well and filter before each use to secure uniform mixture.**

### Sealer over Primed or Painted Metal Surfaces:

1. Sand all areas to be painted.
2. Clean area thoroughly with Prep-All Wax & Grease Remover, wiping off as you go with a clean, dry rag.
3. Blow and tack surface.
4. Spray 1-2 even mist coats of Bulldog, allowing to flash 5 minutes between coats.
5. Bulldog dries to a tack free clear finish in 5 minutes. Dry times may vary based on temperature and humidity.
6. Apply basecoat and clearcoat according to manufacturer's instructions.

### Adhesion Promoter for Plastic Parts:

1. Clean area with Bulldog Abrasive Cleaner, using a gray or green scuff pad.
2. Rinse thoroughly with plenty of water. Wipe dry using a clean cloth and an air hose.
3. Sprinkle an area with water. If water sheets, you are ready to proceed with Bulldog application. If water beads, the cleaning steps 1-3 must be repeated.
4. Spray 1-2 even mist coats of Bulldog, allowing to flash 5 minutes between coats.
5. Bulldog dries to a tack free clear finish in 5 minutes. Dry times may vary based on temperature and humidity.
6. Apply basecoat and clearcoat according to manufacturer's instructions.

**Tinting:** Tint up to 30% with desired urethane or acrylic lacquer basecoat for better hide.

### Drying Times:

**Between Coats:** 5 -10 minutes

**Dry to Next Coating:** Bulldog dries to a tack free clear finish in 5 minutes. Dry times may vary based on temperature and humidity.

**Note:** Bulldog is effective up to 24 hours. If the sprayed part is left overnight, the basecoat can be applied with no issue. If the part is left longer than 24 hours it needs to be scuffed and tacked, again. Apply 1 light coat of Bulldog before applying basecoat.

**Equipment Cleaning:** All tools and spills should be cleaned immediately with lacquer thinner. Care should be taken to keep lacquer thinner away from freshly finished surfaces. Clean spray gun according to manufacturer's instructions.

## PABC 124

### DIRECTIONS FOR USE:

1. Shake well.
2. Apply a 3/8" bead along face of part. Work the cleaner into the surface with a damp green or gray scuff pad.
3. Rinse thoroughly with plenty of water and wipe dry with a clean cloth. Once dry, do not wipe the surface with any type of solvent.
4. To ensure the part is ready for Bulldog Adhesion Promoter application, mist a small area with water. If sheeting occurs, dry the surface and proceed. If water beads up, repeat cleaning as directed above.
