

6056 Nitrogen Welding System

Urethane Supply Company's 6056 Nitrogen Welding System is the most complete and technologically advanced plastic welding repair system available in one package.

Includes:

- Nitrogen Hot Air Welder with precision air regulator, nitrogen/air control box, nitrogen regulator, air supply manifold.
- 5600 Airless Plastic Welder
- Generous amounts of welding rod.
- Fully assembled welding cart. with storage compartments, heating elements holders, and an integral power strip for easy operation.
- Air manifold with outlet for air tools.

Benefits

- Increase profits by producing the highest quality plastic repairs.
- No more wasted time looking for plastic welding supplies.
- Inventory of supplies is simplified.
- Mobility of the cart allows the technician to bring the welder to the part, rather than the part to the welder.
