#### IMPORTANT NOTICE:

Coated abrasives are inert products which do not create any risk when handled or stored. When used on grinding machines they require specific measures to protect the operators. During the grinding operation 90% or more of the particulates of the dust come from the material being ground and, for wet grinding, from aerosols generated by the grinding fluid. Specific attention must therefore be given to the nature of the part and of the fluid and the appropriate protection devices must be installed.

### 1. PRODUCT IDENTIFICATION

**ROYAL COARSE CUT - 40** 

2. COMPOSITION / INFORMATION ON INGREDIENTS	
2.1 Abrasive	<ul><li>[X] Synthetic Aluminum Oxide</li><li>[ ] Synthetic Silicon Carbide</li><li>[ ] Zirconia Alumina (ZrO<sub>2</sub> - Al<sub>2</sub>O<sub>3</sub>)</li><li>[ ] Others</li></ul>
2.2 Bond	<ul> <li>Glue (natural material derived from plant or animal)</li> <li>Cured phenolic resin</li> <li>Cured urea / melamine resin</li> <li>Others</li> </ul>
2.3 Fillers	<ul><li>[X] Calcium Carbonate</li><li>[ ] Kaolin</li><li>[ ] Cryolite</li><li>[X] Others <u>Calcium Sulfate</u></li></ul>
2.4 Backing	<ul> <li>[ ] Paper</li> <li>[ ] Cotton Cloth</li> <li>[X] Combination, paper cloth</li> <li>[ ] Cloth containing polyester</li> <li>[ ] Vulcanized fiber</li> <li>[ ] Others</li></ul>
2.5 Others

## 3. HAZARDS IDENTIFICATION

NOT APPLICABLE.

Coated abrasives are not dangerous products as defined in EC Directive No. 88/379.

### 4. FIRST AID MEASURES

APPLICABLE WHEN COATED ABRASIVES ARE IN USE ON MACHINES

The following recommendations are basic rules during a grinding operation, they must be followed in conjunction with the information appearing in the Material Safety Data Sheets of the material being ground and of the grinding fluid when used.

Dust Inhalation: Remove from exposure, seek medical advice if symptoms persist.

Eyes: Remove from exposure and flush with clean water. If symptoms persist seek medical advice.

Skin: No hazardous effect known. Ingestion: No hazardous effect known.

## 5. FIRE FIGHTING MEASURES

NONE SPECIFIC.

Water, powder, foam, sand, CO<sub>2</sub>, etc. can be used if compatible with operating conditions.

#### 6. ACCIDENTAL RELEASE MEASURES

NOT APPLICABLE.

## 7. HANDLING AND STORAGE

Follow recommendations for machines and federal, state and local regulations.

Store coated abrasives in moderate, constant temperature and humidity conditions.

For detailed recommendations refer to the FEPA Safety Leaflet for Coated Abrasives.

### 8. EXPOSURE CONTROL AND PERSONAL PROTECTION

NOT APPLICABLE WHEN COATED ABRASIVES ARE HANDLED OR STORED.

During the grinding operation with coated abrasives, particles of dust come from the material being ground. The general value for dust is max. 6 mg/m<sup>2</sup>.

When using coated abrasives, follow recommendations for machines and federal, state and local regulations. Refer also to the FEPA Safety Leaflet for Coated Abrasives.

# 8. EXPOSURE CONTROL AND PERSONAL PROTECTION (continued)

8.1 The following personal protective equipment should be used dependent on the operation and the material being ground.

Eye Protection: Machine guarding and safety goggles or face shield

Dust Protection: Use of appropriate dust mask

Hand Protection:

Ear Protection:

Use of barrier cream or protective gloves
Use of ear defenders or equivalent
Use of suitable protective clothing

## 8.2 Hygiene measures

No specific requirements.

#### 9. PHYSICAL AND CHEMICAL PROPERTIES

9.1 Physical state: Solid 9.2 Color: Variable

9.3 Odor: Not Applicable (May give off non-specific odor in use)

9.4 pH: Not Applicable 9.5 Change of physical state: Not Applicable Density: Not Applicable 9.6 Bulk density: Not Applicable 9.7 Vapor pressure: 9.8 Not Applicable **Explosion properties:** Not Applicable 9.9 9.10 Viscosity: Not Applicable 9.11 Solubility in water: Not Defined

## 10. STABILITY AND REACTIVITY

Coated abrasives are stable and non reactive when handled or stored.

**10.1 Conditions to avoid:** Not applicable

**10.2 Material to avoid:** Strong acids, strong bases and strong oxidizing agents may modify

the mechanical characteristics of the products and create safety

hazards when used on machines.

**10.3 Decomposition products:** If coated abrasives are used in accordance with instructions,

no hazardous decomposition products are created.

#### 11. TOXILOGICAL INFORMATION

NOT APPLICABLE WHEN HANDLED OR STORED.

According the the experience gathered for many years, the abrasives, when properly used, have no adverse effect on health. Refer to the preliminary note about dust and aerosols of grinding fluid.

ROYAL COARSE CUT - 40 Page 4 of 4

#### 12. ECOLOGICAL INFORMATION

12.1 Mobility: Not Applicable
12.2 Persistance and degradibility: Not Defined
12.3 Bioaccumulative potential: Not Applicable
12.4 Ecotoxicity: Not Applicable

### 13. DISPOSAL CONSIDERATIONS

After use, coated abrasives may be contaminated with hazardous materials (particles or cooling agents) and should be disposed of in accordance with all federal, state and local regulations.

## 14. TRANSPORT

Coated abrasives are not dangerous products.

### 15. REGULATORY INFORMATION

**EC-Regulations:** NONE. No specific marking required under the EC-Directive No. 88/379

National Regulations:Refer to relevant texts.State Regulations:Refer to relevant texts.Local Regulations:Refer to relevant texts.

## **16. OTHER INFORMATION**

WARNING!

The above indications are based on the existing practice and do not constitute a guarantee. The laws and regulations must be strictly followed by the users who remain responsible for the use of coated abrasives.
