

Technical Data Sheet

No. 5001, 5002, 5003, 5004, 5005 PRE-TREATMENT SYSTEM

- Description:** A system that creates a chromium free conversion

Coating which bonds with all metal surfaces enhancing adhesion and corrosion protection
- Product:** Composition: Zinc Phosphate conversion coating

Color: Slight iridescence (yellowish brown)

Temperature Range: Up to 180 degree F

Shelf Life: Up to 3 years from manufacturers date
(See date code on each product)

Prevents corrosion, promotes adhesion
- Benefits:** Can be used on ALL types of metal

Substitute the use of wash, etch and epoxy primer

Can be used with ALL paint systems

Can be used over body filler
- Exposure:** Ingestion – see doctor or hospital

Inhalation – use respirator

Skin – use latex type gloves

Hazard rating – 1,0,0,0
- Fire Fighting:** Extinguishing media – water, C02, foam, dry chemical
- Transport:** DOT Classification: Not regulated commodity
